If you receive the "Forum account is not" issue upon opening your launcher, follow these steps to fix it:

1. Make sure your launcher is **completely** closed.
2. Press your **left Windows button + R** at the same time.
3. Type "**%appdata%**".
4. You should be in a folder called "**Roaming**" - go one folder back till you see the "**Local**" folder.
5. Within the "**Local**" folder you should find one called "**City_Life_RPG**" - open that.
6. Delete **all** the folders in there.

Once you've done that open up your Internet Explorer and log into the City Life RPG forum. After you successfully logged into the forums close the Internet Explorer and open up your Launcher - and now it should work.
